

Window Wiper Kit

View inside your Coperion feeder, while in operation

- Cleans viewing ports easily to give a clear view of belt tracking, tension roll position and material delivery
- Liquid cleaning agents can be injected through the knob while feeder remains online
- High grade corrosion resistant materials for durability and long life
- Tempered soda lime glass for safety
- Easily retrofits existing Coperion feeders

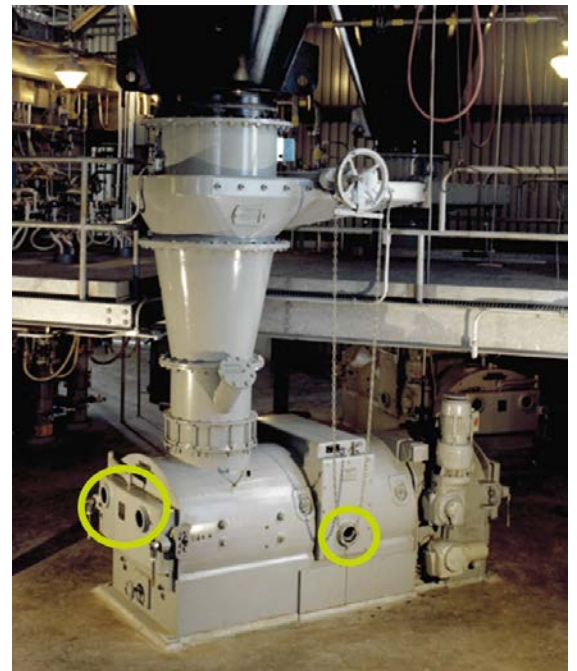

Window Wiper Kit

Give your plant technicians a clear view of the workings of your Coperion feeder with the Window Wiper Kit. By being able to directly observe the belt, tension roll and coal delivery, your maintenance personnel can identify feed problems before they become critical – without taking the feeder offline.

Produced from tempered soda lime glass and corrosion resistant materials the Window Wiper Kit is built for safety and longevity. Additionally, the special liquid injection feature means that you can clean difficult coal dust build up. The kit is available as an exact replacement for the glass of your existing feeder viewing port, making installation simple and easy by your own technicians.

The Window Wiper Kit is the simplest and most cost effective upgrade you can make to your existing Coperion feeders to maximize feeder uptime and performance.
