

Heat Exchanger

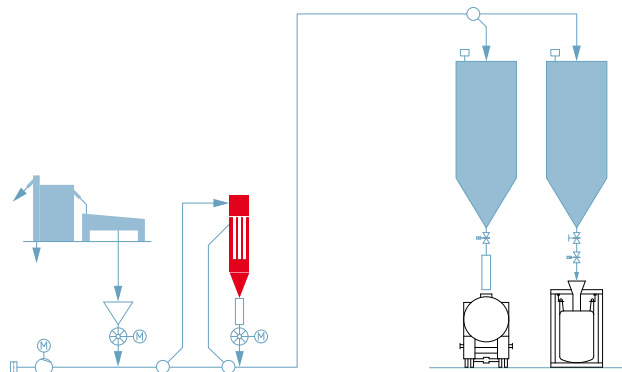

BULK-X-CHANGE* BXC

- _ Patented distributor plate at product inlet
- _ Applicable for free flowing bulk solids such as plastics, fertilisers, minerals, food ...
- _ Compact design without moving parts
- _ Controlled discharge at outlet with metering devices (e.g. Rotary valve)

Option for special applications:
Rotating product distributor with air purging

Application example: Integration of the Bulk-X-Change* Inline Gravity in a pneumatic conveying system

SPECIAL COMPONENTS | HEAT EXCHANGER

APPLICATION	Cooling and heating of free flowing bulk solids
FUNCTION	Tubular heat exchanger with vertical mass flow of bulk solids through pipes, cooling/heating medium at shell side
MATERIAL OF CONSTRUCTION	Stainless steel
SIZES	Individual sizes according thermal calculation
